Today!!!**

It'll help shape the  
telecom billing  
industry!

Dear CFO/Telecom Executive,

EbsTel is a new business venture created by former Telecom Senior Executives who understand and have passion for billing. We are neither TEM Provider nor Auditor. We are billing and telecom experts committed to changing the mindset and perception in the market that telecom billing is bad or difficult to comprehend. Our focus is providing advocacy for end-users and insuring the integrity of the billing process. Ideally we can help reduce your telecom expenses by optimizing your baseline infrastructure (reducing expenses while maintaining same level of service), suggesting policy changes and formulating a plan to help you eventually migrate to IP in the future. Saving you money and understanding the financial challenges associated with telecom spend is key to our business. We have experts on hand to help you with any issue/concern related to telecom. Please give us a call...we offer a free consultation. Our website will provide you more insight into what we're all about. Thank you for your time in reading this material.

Steve Arocho  
President & CEO  
Enterprise Billing Solutions - Telecom

## www.ebstel.com

Have you ever...

- ...been denied interest on a claim?
- ...submitted a claim directly to a carrier without the advice of an auditor?
- ...been denied a claim of over-billed charges?
- ...had difficulty in renegotiating a contract?
- ...been charged for services you are no longer using or not working?
- ...been charged back-billing as a result of a carrier's revenue assurance program?

Do you know...

- ...that the 2006 Federal Excise Tax refund expires this April?
- ...carriers can make mistakes in charging the correct prices for products/services?
- ...that Service Level Agreements for billing can be written into new contracts?
- ...whether the appropriate amount of discounting has been applied to your accounts?
- ...whether the taxes, surcharges and OCC's on your bills are valid?
- ...whether you have contracts with vague language that require
